

Varenummer: 2307081252
 Beskrivelse: E+G Mini mekanisk tæller
 DD50-FN-05.0-S-GR Grå

Mål

Table of possible combinations								
Reading position	Pitch	Reading after one revolution				Speed (rpm)*	Direction of rotation	Colour
		0	1	0	1			
 AN vertical upper	1.0	01.0	0.10	010	1500			
 AR vertical lower	2.0	02.0	0.20	020	1250			
 FN front upper	4.0	04.0	0.40	040	625			
 FR front lower	5.0	05.0	0.50	050	500			
	10	10.0	1.00	100	250			

01.0	Standard readings
0.10	Readings available on request (see 17.2.2.1)

DD50 - FR - 010 - S - GR

* The maximum rotation speed (rpm) of the spindle reported in the table corresponds to a maximum rotation speed of 25,000 units per minute of the test roll on the right side of the counter. Rotational speed tests have been performed in our laboratory under standard operating conditions.
