FN top	4.0	04.0	0.40	040	625	S anti-clockwise	GR grey RAL 7035	
FR top	5.0	05.0	0.50	050	500			
FR bottom	10	10.0	1.00	100	250			NR corfu RAL 7021

01.0 Standard reading
 0.10 Reading available on request (see 17. page)

DD50 - FR - 010 - S - GR

* The maximum rotation speed (rpm) of the spindle reported in the table corresponds to a maximum rotation speed of 25,000 units per minute of the test roll on the right side of the counter.
 Rotational speed tests have been performed in our laboratory under standard operating conditions.
