

IEL+x SOFT

Two-volume
revolving handles

ELESA Original design

SOFT

technical informations

Material

High-resilience polypropylene-based (PP) technopolymer coated with "soft-touch" thermoplastic elastomer (TPE) chemically bonded, hardness 70 Shore A.

The coating material is certified in compliance with FDA (U.S. Food and Drug Administration).

Resistant to solvents, oils, greases and other chemical agents.

Colour

Black, matte finish.

Standard executions

Zinc-plated steel shank, hexagon socket at threaded end.

- IEL+x: without ring.

- IEL+x-A: with matte anodised aluminium ring (ELESA original design).

Special executions on request

IEL+x-H: with magnifying lens for labels with marks and symbols.

Features and applications

Handles coated with "soft-touch" elastomer: it improves the grip even in the presence of oils, greases and sweat from the hand. Particularly suitable for applications on fitness machines, tools and machines for gardening and goods transport, high-precision instruments and disability aids.
