

GN 430

Guard safety handles

technical informations

Aluminium tube

- Version SW: RAL 9005 black, matte finish, epoxy resin coating.
- Version EL: anodised, natural colour, matte finish.

Side end caps

Polyamide based (PA) technopolymer, black grey colour.

Special executions on request (For sufficient quantities)

Different lengths.

Features and applications

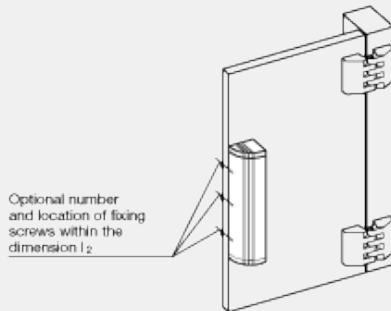

Typical applications for guard safety handles GN 430 include swivel or sliding doors on protective doors and equipment. They are also suitable for use as drawer handles.

The screw channel for screw size M6 (extruded aluminium) allows an optional number of fixing screws in any position within the dimension 12. The minimum screw-in depth of 10 mm in the guard safety handle GN 430 must be maintained.

The aluminium profile section is available in any length; the end caps are also available individually.

Assembly instructions (for every screw coupling)

- Maximum load: 400 N.
- Maximum tightening torque: 4 Nm.
- Minimum screw-in depth: 10 mm.
